

"The question of whether or not celestial bodies besides our Earth are inhabited or were inhabited by living beings is certainly one of the most interesting that exists for the thinking human being and could be, in all probability, already confirmed." -- Dr. David F. Weinland

"The forms of the creatures so far recognized in the chondrites are all associated with water; the whole mass of these meteorites seems to have been built underwater, the countless microscopic organisms either petrified retroactively or, more likely based on the chemical analysis of these bodies, combined in their own way with the mineral substances dissolved in this water and assimilated the same, similar to how present-day mussels, corals, bacillaria, equiseten, and various Vibrionaceae skins silicify and calcify in a similar manner to the bones of vertebrates." -- Dr. Hermann Karsten
